

SID Display Week 2018: MAC Thin Films, Inc.

MAC Thin Films, Inc. Exhibits PrintFree® and HD PrintFree™ at Display Week 2018 Los Angeles, California May 22-24, 2018

SANTA ROSA, Calif., May 21, 2018 -- MAC Thin Films, Inc. will be expanding their exhibit space at Display Week 2018 in Booth # 537. They will be showcasing their PrintFree® and HD PrintFree™ products.

MAC Thin Films, Inc. PrintFree® and High Durability PrintFree™ enable best-in-class anti-reflection coatings combined with a superior anti-smudge, easy to clean oleophobic treatment. These products are well suited for demanding display applications that benefit from having:

- PrintFree® Brightness < 0.3%
- HD PrintFree™ Brightness < 0.5%- Rub resistance exceeding 1,000,000 cheesecloth strokes (HD PrintFree™)
- Easy cleanability
- Excellent Haptics
- Sheet sizes up to 25" x 32" and glass thicknesses from 0.55mm to 6mm

MAC Thin Films is a world leader of vacuum deposited thin film coatings designed for applications that require precision anti-reflective properties, conductive anti-reflection features and high reflecting front surface mirror characteristics. Using a variety of rare and unique materials, including magnesium fluoride, MAC Thin Films delivers superior performing products from both the in-line (MAC) platform as well as its batch manufacturing systems.
